#### **DETAILED ACTION**

# Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because it uses the term "means". Correction is required. See MPEP § 608.01(b).

## Claim Objections

3. Claims 22, 23, and 30 are objected to because of the following informalities: In claim 22, line 3, the word "art" should be changed to --an--. In claim 23, line 3, the word "dosed" should be changed to --closed--. In claim 23, line 3, the word "dip" should be changed to --clip--. In claim 30, line 1, a period appears at the end of line 1. Appropriate correction is required.

# Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Application/Control Number: 10/537,735 Page 3

Art Unit: 3612

5. Claims 17-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 17, in line 15, the phrase "said one end of the or" is indefinite. It is unclear what is claimed by the phrase.

Claim 19 recites the limitation "its leading end" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 24 recites the limitation "the bush bore" in lines 1 and 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 24 recites the limitation "the outer cross-section shape of the perimeter frame" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 25 recites the limitation "the opposite ends of the bush" in lines 1 and 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 25 recites the limitation "the body portion of the bracket" in lines 2 and 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 26 recites the limitation "the axial length" in line 2. There is insufficient antecedent basis for this limitation in the claim.

### Allowable Subject Matter

6. Claims 17-28 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Application/Control Number: 10/537,735

Art Unit: 3612

7. Claims 29-31 are allowed.

### **Conclusion**

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fengel et al., Ament et al., Guimelli, and Mateny disclose safety screens.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason S. Morrow whose telephone number is (571) 272-6663. The examiner can normally be reached on Monday-Friday, 8:00a.m.-4:30p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Dayoan can be reached on (571) 272-6659. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
